**Lead Consultant - Healthcare Technology in NHSRC**

National Health Systems Resource Centre (NHSRC) has been set up under the National Health Mission (NHM), Ministry of Health & Family Welfare, as an autonomous registered Society, to channelize technical assistance and capacity building support to the states for strengthening the public health system. The NHSRC is also mandated to contribute towards National strategic health planning and programme design.

If you have a commitment to health equity and excellence, here is a unique chance to work with a team committed to shaping the public health landscape in India. The position offers you an opportunity to participate in the process of strengthening health systems, improving health service delivery and enabling positive health outcomes, through hands on implementation assistance at national, state and district levels. Working with a trans disciplinary team, you can discover, adapt, co-create and disseminate solutions to multiple challenges related to service delivery systems, universal primary health care, human resources for health, community processes, health financing, quality of care, public health planning and health promotion. This is an opportunity to support health systems strengthening at scale, learn from district and sub district implementation, undertake knowledge translation, and enable realization of the vision of universal health coverage.

The position is specifically for the Lead Consultant - Healthcare Technology (one position) purely on contractual basis.

**Role and Responsibilities:**

- Take a leadership role in the health care technology division to design and support implementation in accordance with current priorities of NHM and Ayushman Bharat.
- Lead the team to support state level implementation of technology intensive health programs such as the Free Diagnostics, Biomedical Equipment Maintenance and Management and Dialysis Programmes, and newer initiatives.
- Gather and analyse evidence from field review visits from different states/districts to inform policy and advocate appropriate changes
- Undertake progress monitoring through frequent interactions with state teams through structured field visits and use of online platforms.
- Work closely with states to assess requisite modifications in policy and programme in keeping with new changes in technological upgrades in medical devices
- Enable recommendations to the MoHFW and other stakeholders on emerging technologies, as relevant to the sector.
- Support the identification, assessment and uptake of health technology innovations as identified in the National Health Innovation Portal
- Undertake/Commission high quality assessment of health products based on requests by Ministry of Health & Family Welfare.
- Work with programme divisions in the MoHFW to enable synergies with NHM.
- Engage with the senior policy makers at Central level as required: for representing the division in meetings, for carrying out advocacy, present evidence from State field visits etc
- Mentor and support the team members and assist the Advisor in tasks related to crafting individual responsibilities, undertaking performance appraisals and conducting team meetings.
- Undertake other tasks which may be assigned from time to time by the Executive Director.
- Work closely with other divisions within NHSRC, RRC-NE and other stakeholders as required

**Qualification & Experience:**

- Graduation or higher qualification in Science / Medicine / Public Health / Biomedical Engineering / Management.
- Minimum 10 years of work experience in healthcare services, dustry, manufacturing, hospital administration or a mix of these.
- Willingness to travel to states & districts to provide technical assistance & ability to work on different assignments simultaneously to meet the timelines for assignments.
- Computer Skills: Proficiency in commonly used packages like MS Word, Excel, Power Point. Ability to use internet to for desk research, literature review and accessing other relevant documents.
- Excellent oral and written communication skills in English, including an ability to write crisp, unambiguous technical reports. Working knowledge of Hindi also desirable.

- Demonstrated ability to work in a multi-disciplinary team environment along-with excellent communication, presentation skills and interpersonal abilities.

*Formal educational qualification and experience could be relaxed when there is published work of high quality or whenever there is work experience of specific relevance.*
